SJC Web Design Fall 2015

Click on the image to view each student website

Saint Joseph's College in Brooklyn Web Design courses are taught by Kat Croft and Niki Selken. The students conceived, prototyped, and designed these interactive pieces using the Adobe CC software, Wordpress, HTML, CSS, and good old pencil and paper.

User Scenarios
DZ Guitar Studio
By Qian Yi Chan

Elaine Chan
Elaine Chan is 28 and a mother of a 7 year olds. She lives in Staten Island with her family. Her child is a high energy boy who is hard to focus when learning something. But he is passionate on things that are relates to music. So, Elaine thinks that for him to learn guitar will be helpful to improves his concentration.

Eva
Eva is 27 year old. She's an Artist and a Chinese teacher who lives in Queens. Her husband is a band's bass player. Isn't an artist of music and not talented in any music instruments. But she really wants to give her spouse a special on his birthday. By playing their love song with a guitar. Eva is kind of client who needs private lessons and only aims to learn one song.

A Look Into My World
By Urwah Ahmad

User Types: Artists, Writers, Involved/ Active People, Readers, Photographers

Sadia Iqbal

Sadia is a 23 year old medical student who lives in Brooklyn. She loves to draw when she wants to relax. She could not think of anything to draw and asked her fiend. Her friend recommended she check this blog. The website author for alookintomyworld.com has a different styles of drawing and the artwork was interesting to look at and get inspiration from.

Zack Somerville

Zack is a high school student living in Birmingham. Zack loves knowing what other people think about an issue and is an active student. He was talking to his friends and they told him that he should check out this blog. The blog alookintomyworld.com chooses an issue for the week and discusses it from different points.

JESSICA SELESTE
The Last Airbender
Poster Design

As a final project for the Graphic Design course, my students had to create a poster for any live event. This required them to juggle images, title text as well as engage with hierarchy and grouping for the information about when and where the piece takes place. Students worked from thumbnail sketches to mock-ups to Adobe CC files to full color 11x17 prints of their posters.

NICOLE PISTEL

roomr

Poster Design

Nicole created a poster for her father's café's grand opening. She resigned the logo as well as created a design based on the vintage Edison lights that hang in the space.

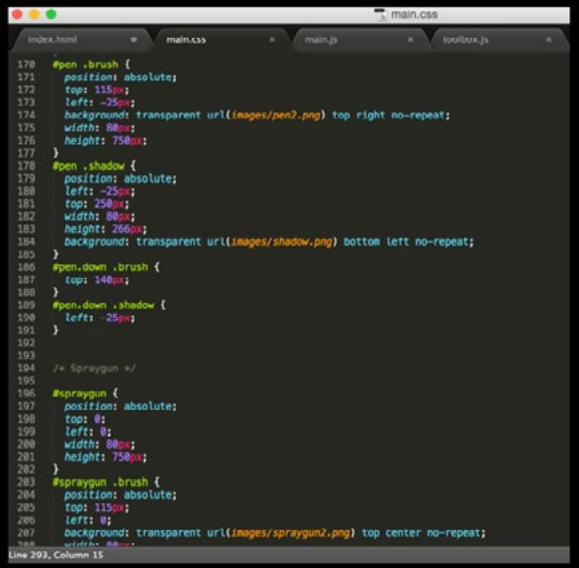
PARSONS SCHOOL OF DESIGN
DESIGN AND TECHNOLOGY MFA
MANHATTAN

JS Library Manipulation

- Creating new tools
- Changing context of drawing board
- "Zombifying" everything
- Changing shapes / colors of paint selection



MARIELLE VERNI
Zombie Finger Painting
JAVASCRIPT PROJECT

Marielle was tasked with creating a project with JavaScript using any library. She used Canvas, Ghostwriter, and jQuery. She created a heavily stylized interactive drawing tool, just in time for Halloween!

ANDREW PARK
Type to Design
JAVASCRIPT
Project

Andrew Park created a text to image based typing tool. The user types on the keyboard and a fantastic image of custom designed characters appear on the screen. He created this by desigingn the letters in illustrator and combinging them with code, specifically Canvas, p5 and jQuery.

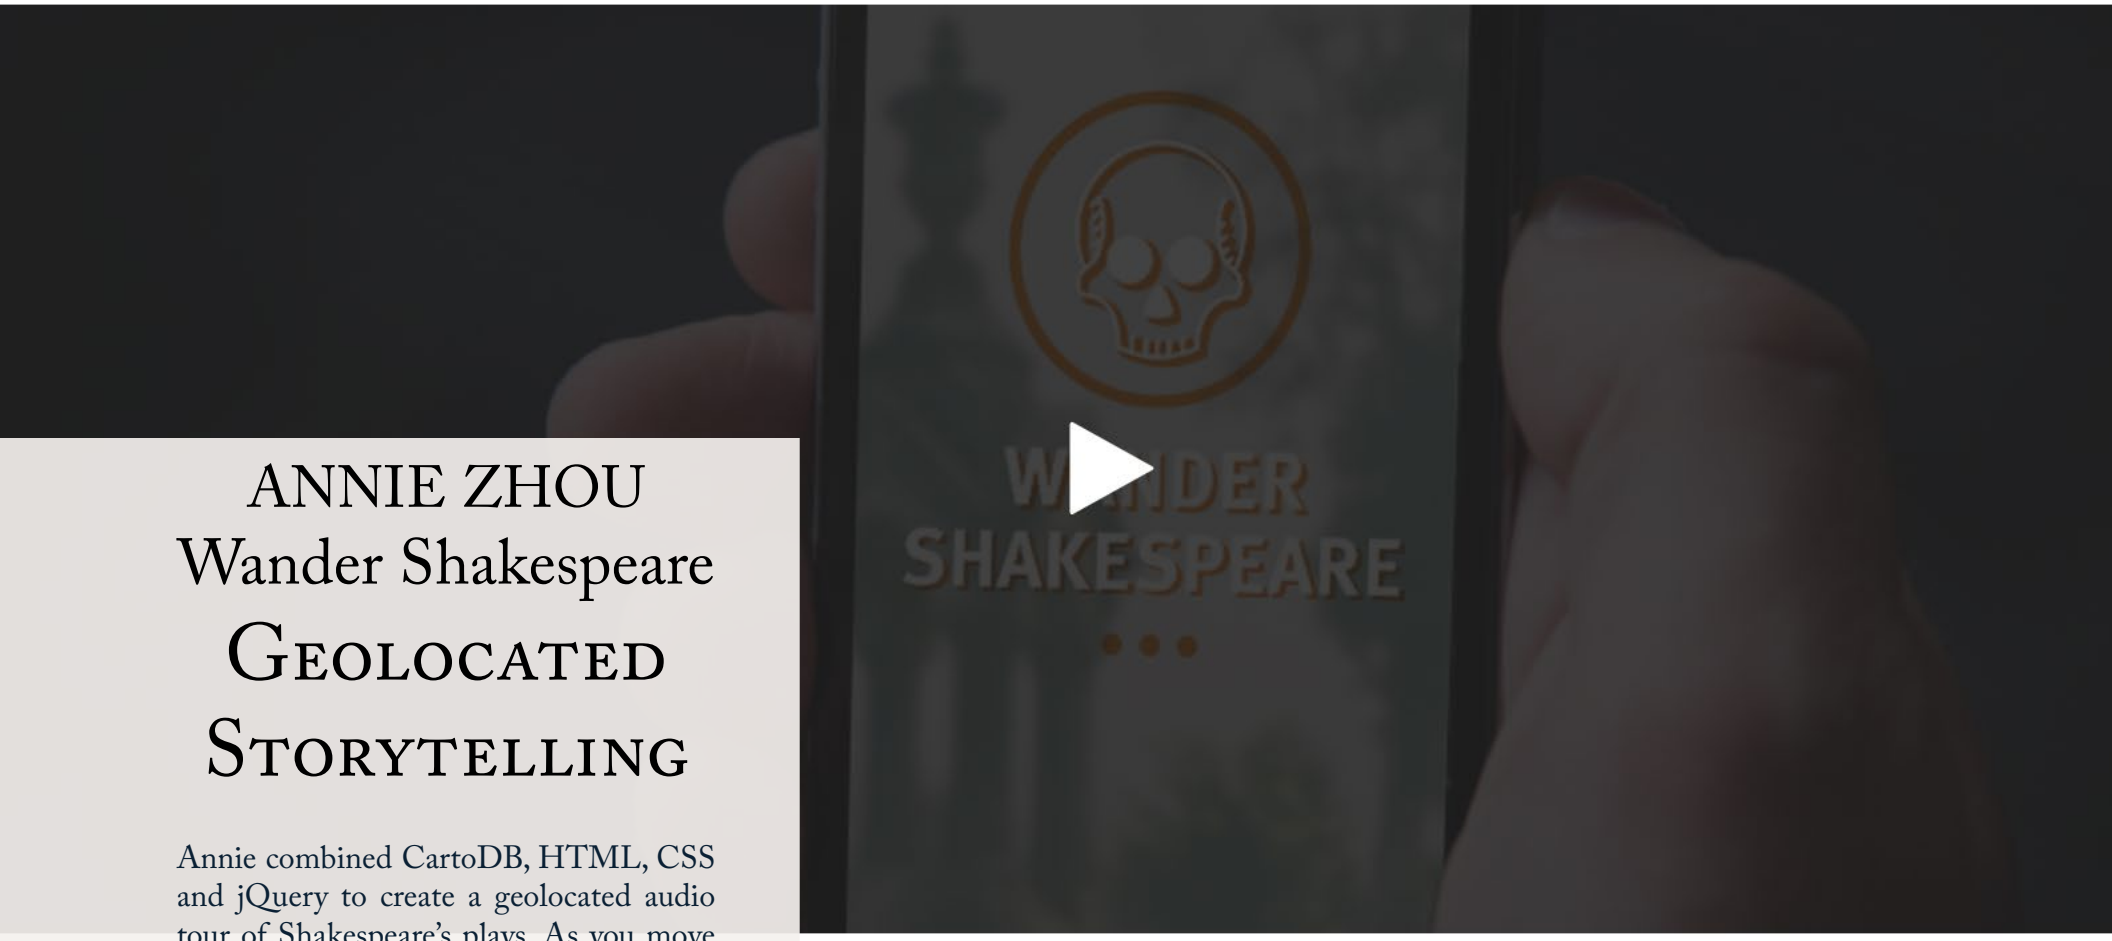
Project

WANDER SHAKESPEARE

Wander Shakespeare is a location aware app, triggered by your proximity to a recommended location. Places to 'Wander' are curated tightly for their beauty, culture, and their symbolic relationship to the scenes in Shakespeare.

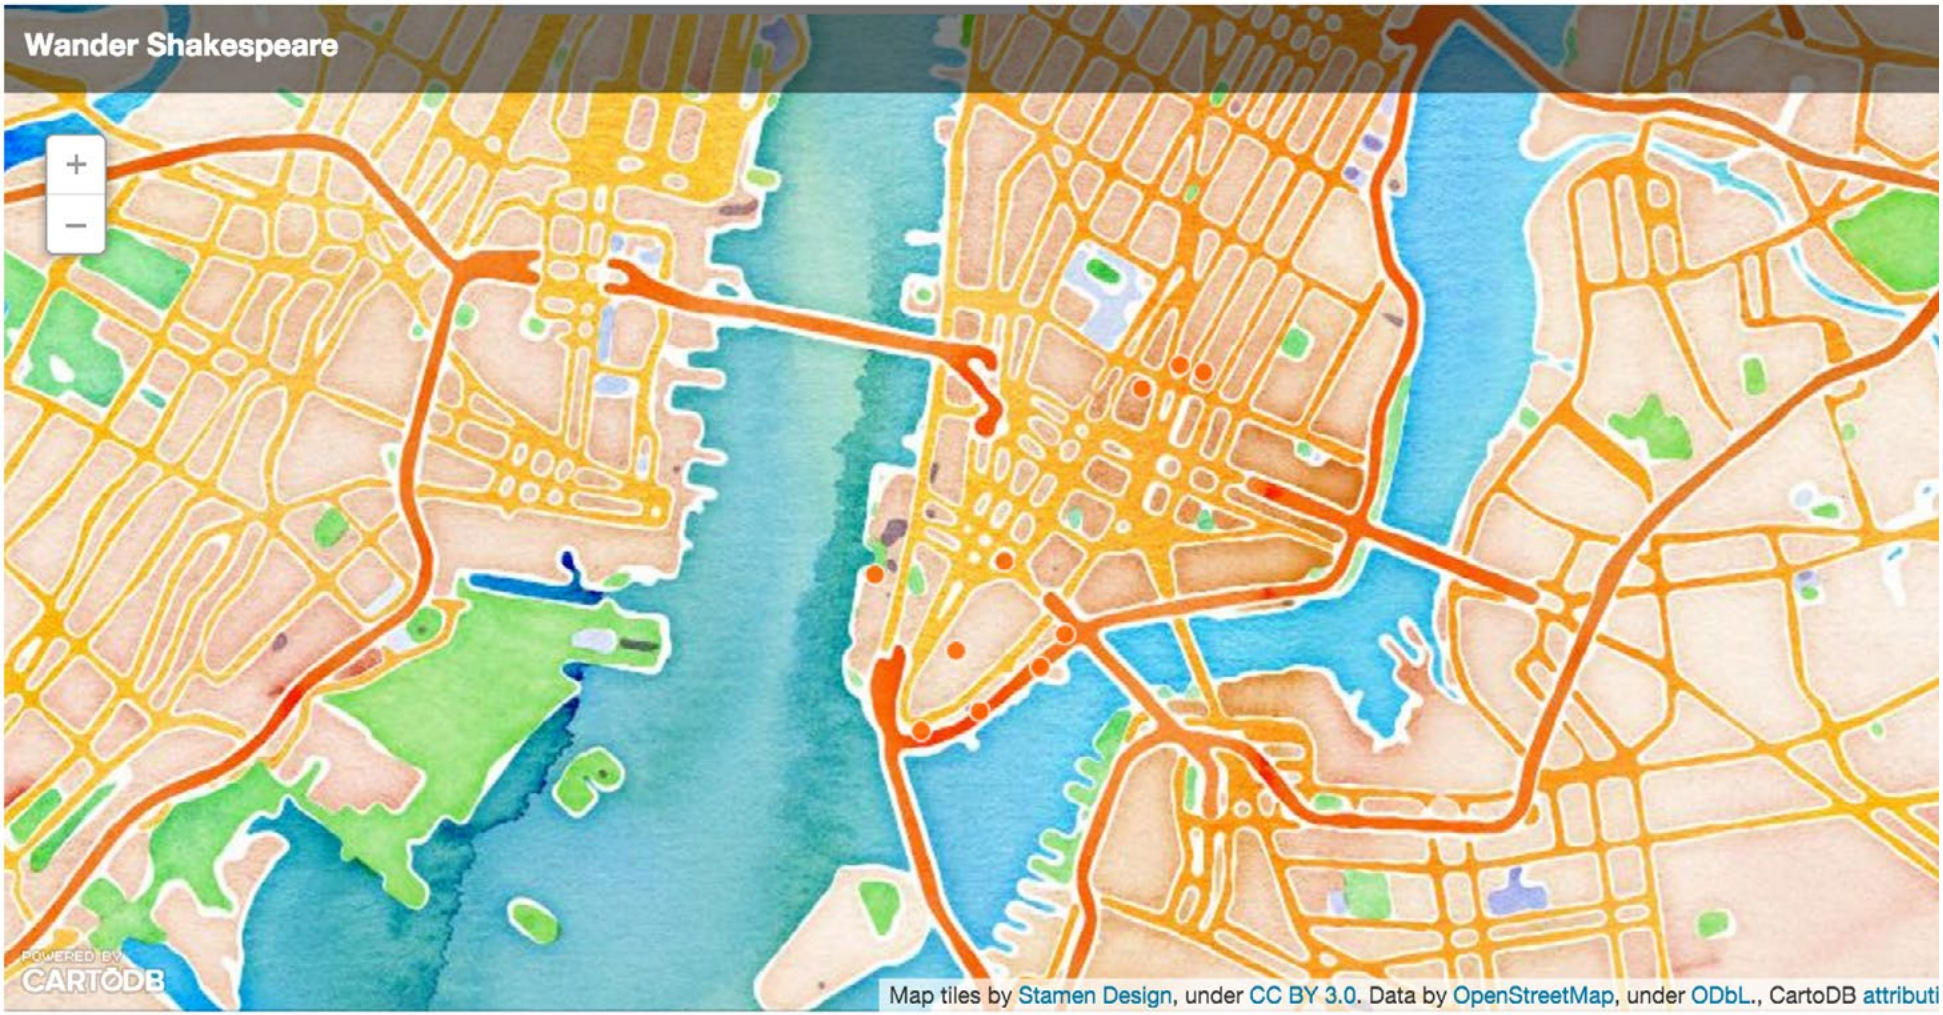


ANNIE ZHOU
Wander Shakespeare
Geolocated Storytelling

Annie combined CartoDB, HTML, CSS and jQuery to create a geolocated audio tour of Shakespeare's plays. As you move through NYC the App will trigger audio that corresponds to your location.

LOCATION BASED

Each scene takes place in a New York gem that is little known to your average tourist.
Wander Shakespeare gives you a chance to explore these beautiful locations.



VISUAL COMMUNICATION TWO

UNIVERSITY OF SAN FRANCISCO
DESIGN UNDERGRADUATE
SAN FRANCISCO

The following is an ongoing project created through the Visual Communication II Design course here at USF. I hope to continually progress with my knowledge of HTML and CSS, and potentially use this website for future projects.

KATHRINE JAMES
Portfolio Website

Katherine created her portfolio website for our first large-scale project. Students started with researching websites they found inspiring and analysing them, making paper prototypes, then digital wireframes for each page of their site, then creating two visual comps with a critique, and finally they coded the chosen design using HTML and CSS.

CASEY HABER

CASEY HABER
Portfolio Website

copyright

Casey created his portfolio website for our first large-scale project. Along with using HTML and CSS Casey experimented with P5js and jQuery.

Portfolio

Biography

"An anesthetic is used to dull or deaden, causing sleepiness and numbness. In contrast, aesthetic is seen as something that enlivens or invigorates both body and mind, awakening the senses."

- Cawthon and Moere
